Exchange rate:	U.S. \$1.00 = Cdn.	\$ 1.2380 1.2207

The change in net assets as reported in U.S. dollars from period to period is primarily a result of the changing market prices of gold and silver and the proportion of each held by the Company. Also, because gold and silver are initially denominated in U.S. dollars, changes in the value of the U.S. dollar relative to the Canadian dollar will also have an impact on net assets when reported in Canadian dollars.

Approximately \$80,904,000 was added to total assets as a result of the issuance of 15,000,000 Class A shares through a public offering in November 3, 2004. These shares were issued at a premium to net asset value such that there was no dilution of existing Class A shareholders' interests. However, net assets increased by only approximately \$63,438,575 during the three months ending January 31, 2005 as a result of gold and silver prices declining. Of the net proceeds from this public offering, the company purchased 96,000 fine ounces of gold at a cost of \$40,790,400 and 4,800,000 ounces of silver at a cost of \$35,376,000, both in physical bar form except for 67 ounces of gold which were received in certificate form. The balance of approximately \$4,737,600, was retained by the Company in interest-bearing cash deposits for working capital purposes.

Net income (loss) per share:		
Class A shares	\$ (.19)	.41
Common shares	\$ (.19)	.41

The net loss (inclusive of unrealized depreciation of investments) for the three months ended January 31, 2005 was \$17,465,425 compared to net income (inclusive of unrealized appreciation of investments) of \$21,295,515 for the same period in 2004. Since January 31, 2004, net assets have increased by approximately \$194,378,250 or 68%. The Company has used the bulk of the proceeds of the two Class A share issues over the past twelve months to purchase gold and silver bullion, primarily in bar form. Certain expenses, such as administration fees that are scaled, and together with income taxes, vary in proportion to net asset levels, or, in the case of stock exchange fees (included in shareholder information), with issuances of Class A shares. Safekeeping fees and bullion insurance costs increased as a result of the purchases of physical gold and silver bullion discussed above. Administration fees remitted to The Central Group Alberta Limited for the three months increased to \$386,818 from \$213,565, such increase being at the rate of one-quarter of one percent per annum on the increased assets under administration. Professional fees increased as a result of legal and audit work required to adopt accounting guidelines and corporate governance rules and regulations.

Despite an increase in overall expense levels, the operating expenses (which exclude income taxes) as a percentage of average net assets, declined to 0.12% for the three months ended January 31, 2005 compared to 0.14% for the same three-month period in 2004. For the twelve months ended January 31, 2005, the operating expense ratio was 0.48% compared to 0.61% for the prior twelve-month period.

Central Fund of Canada Limited operates as a specialized investment holding company which invests primarily in long-term holdings of segregated and unencumbered gold and silver bullion and does not actively speculate with regard to short-term changes in gold and silver prices. At January 31, 2005, the Class A shares of Central Fund were backed 97.5% by gold and silver bullion and may be purchased, held and sold with ease on either the American Stock Exchange (CEF) or The Toronto Stock Exchange (CEF.NV.A).
